- Travelled to Europe on a solo-trip and lived to tell the tale

- Favorite ice cream flavor is Ube from Mitchell's, San Francisco

APPLICATIONS DEVELOPED

Aftershock – live | github

Earthquake tracker application

- Served as main front end developer that implemented a mobile first design by using **Bootstrap 3** components and grid system. App built in **Javascript, JQuery, HTML5, CSS3**
- Combined three API's: USGS (United States Geological Service), Google Maps, and Twitter.
- Displayed statistics of earthquake data with **Google Visual Data** techniques

travelStarter – live | github

Build and find your next adventure

- Led a team of 5 developers in the creation of a single page **ReactJS, Redux** and **NodeJS** application
- Agile-process approach for planning project requirements and components
- Utilized **Bootstrap 4** components for mobile first design, while adhering to **Material Design** concepts in order to create the **UI/UX** of application

Couch Pugtato – live | github

Relax at home with our movie and food recommendations

- Performed as front end developer and worked with **ReactJS** and **Redux** to create a single page application
- Collaborated with three developers and built application by combining API's such as: the Movie Database, Yelp API, Youtube
